L2: Entry 78 of 176

File: USPT

Nov 30, 1999

DOCUMENT-IDENTIFIER: US 5994015 A

TITLE: Carrier materials

Detailed Description Text (8):

An embodiment of the present invention, employing water as the dispersing and coating vehicle, coupled with a water-soluble temporary binder, allows full control of the dispersion of both electroconductive particles, and charge-control dyes using conventional dispersing apparatus, as well as allowing the controlled and uniform application of such coatings by ordinary methods and equipment such as Wurster-column fluidized bed sprayers, modified vacuum drier coaters and the like.
